

# Chasin Foods

## Embrace the Plant-Based Future with Chasin Foods!

### Keep Your Menu Fresh AND Innovative

The plant-based diet is more than a fad or trend: it is a revolution. Industry research has found that more than 9.7 million Americans follow a plant-based diet. The popularity of new, plant-based meats has spurred this seismic change – 90% who have tried plant-based meats in the past year would do so again. No longer does a customer have to carry the label of vegan or vegetarian to enjoy a delicious plant-based meal. It is clear this movement is here to stay, and going forward, your customers will expect to see creative, plant-based options available throughout the menu.

Chasin Foods is here to help. We make it simple to innovate by supplying everything needed to add tasty, plant-based dishes your customers will love. These featured items will play a key role in adapting the menu, growing your customer base, and helping YOUR restaurant capitalize on the plant-based movement.
